We threw a week long program on the week of Valentine's to celebrate all of the amazing women and to give back to our community in Denton! This was our first time making these programs and we're so grateful and proud of the officers and members that put so much work into keeping the programs lively and fun!

The members of UNT SWE all came together to give the UNT students a unique experience during Valentine's Week! Throughout the week members volunteered to advertise SWE at Discovery Park's table and host games and then on Friday not only did we table but we put together a presentation and games for the highschoolers to participate in to learn more about engineering and UNT in general! SWE Officers made great programs and had ample help from SWE members who were willing to take time out of their day to help everything occurring to flow better. We had programs every day of the week and had a great turnout!

Thank You!

Member of the Month

Isabel Wetegrove is a sophomore pursuing a bachelor's degree in Mechanical and Energy Engineering. She began her studies at Collin College and earned an associate's degree in general science. Isabel then transferred to UNT and has been a member of SWE since January 2022. In her free time, Isabel likes to work on small Raspberry Pie projects and play video games.
