

**SWE MEETINGS**

**5th General Meeting with Peterbilt on October 25th**

SWE UNT meets with many professionals that offer the members advice and share their experiences at the meeting. We have had speakers from many different works of life, in the aeronautical field, medical, computer science, and engineering! It is important to share their experiences so younger members know what to expect and those that have experienced the workforce know they are not alone. The meetings are a great place to connect with other women in STEM as well as gain more knowledge of the real world field and helps the transition from college to work force a lot.

Three of our notable speakers were Dr. Sydney Taylor from NASA, Jessica Westlund from JP Morgan & Chase, and Jessica Montes from Lockheed Martin. Dr. Taylor talked about building our confidence in the field and more importantly maintaining that confidence in the field. Jessica Westlund talked to us about different internships and programs the company offered and a day in the life of their jobs. Jessica Montes talked to us about mentoring, public speaking and presentation tips. Every speaker has added to our wisdom and to hear from these amazing women is constantly giving to us. Every speaker does such a great job teaching us more

## Girl Day in Engineering (February 26)

Girl Day in Engineering is a way for engineers in college to mentor future engineers and create fun STEM activities that help children explore the world of science in a safe way and a simple way the understand the core principles. The event will take place the last day of Engineering Week (February 20-26)

## > Member of the Month: Alana Babilonia

Hi, my name is Alana Babilonia. I'm pursuing a Cybersecurity major with a minor in Spanish. I was born in Puerto Rico but I moved to Frisco, Texas for high school. I like music, lifting weights, and watching anime. I joined SWE this year as it's my first semester at UNT. :)

# Women Engineers 2021 Conference

The SWE conference is a meeting of professionals and engineering students who attend the lectures and learn more from the people that attend. Not only does this allow for networking with companies and other students and for more opportunities for internships but also for information that contributes to the students' classes. One of our officers Megan Luthra attended a session called "You are the Weakest Link: Human Factors Engineering in Cybersecurity" by Zaineb Ahmed that not only "opened [her] eyes to the complexity of how human behavior can play a role in
